Executive Desk Top Cyber Simulation Datasheet

About Desk-Top Cyber Simulation:

Desk-Top Cyber Simulation provides opportunities for the organisation's leadership and security professionals to practise and refine "cyber security oriented skills" in order to improve their response to cyber-events.

Key Benefits:

The simulation's key benefits are:

- ✓ Enable the Executive team to face a cyber-security scenarios in which creativity, imagination and exceptional actions are ignited to improve and establish readiness in dealing with the practiced threats.
- ✓ Reflect a realistic crisis management situation that Executives could face in the emerging cyber security landscape. Understand the key areas participants need to address to defend against, and respond to, cyber incidents.
- ✓ Raise the readiness and involvement level of Executives in the event of a Cyber-attack and to test the familiarity and effectiveness of the company 'Crisis Management Plan'.
- ✓ Empower Executives to adjust and enhance decision making procedures and strategies in the context of challenging information security and cyber dilemmas and scenarios before, during and after a cyber-event.

Approach:

- ✓ There are several stages for preparing and implementing the Executive Cyber Simulation exercise.
- ✓ Preparation stage: includes mapping and defining the topics that will be practiced and examined, determining the level of difficulty of the exercise, setting the central dilemmas that the organisation will have to deal with. This stage will require some involvement from Executives, especially the CIO/CTO/SISO and/or the Risk and Compliance Officer, and a review of the organization's Crisis Management Plan and other key process flows.
- ✓ Experience stage: performing the Executive simulation, during the course of a half a day exercise. The exercise will involve several executives, including the Head of IT, Head of Risk and COO. Each executive may decide to include additional team members during the scenario.
- ✓ Evaluation, summary and learning stage: based on the participant's activities and achievements during the simulation and the administrators observations and conclusions.

Gold N' Links (Pty) Ltd trading as GNL Cyber
Registration Number 2016/493316/07

Directors: FC Platt (Chairman), D Smollan, Roi Shaposhnik*, H Kilov and Dr Graham Wright (Managing Director) *Israel.
Block D, Hurlingham Office Park, Woodlands Avenue, Hurlingham Manor, Johannesburg, South Africa

Delivering A Secure Cyber Environment -
